

A girl called Anastasia

Once upon a time there was a cottage there a girl lived. She was 5 years old but her mum said she should go to the market, so she went to the market. It was very cold outside and scary but she went on and on. It started to rain but she went on and on. And then she heard a miau. That was a cat. She took it and ran to the market. She bought everything and ran home.

On the way there was a hole. She did not know that. So she fell in it and broke her leg. Her mother was waiting and waiting and then she put her shoes on and jacket and went outside. She was going to the market. On the way she saw eyes and then they spoke. "Help me!" and then the mummy understood and called the ambulance. The ambulance picked her up and drove away without her mum. Her mum went home and told her father all about their daughter. They jumped into the car and drove to the hospital. On the way they bought flowers for her. *of the things and went home.*

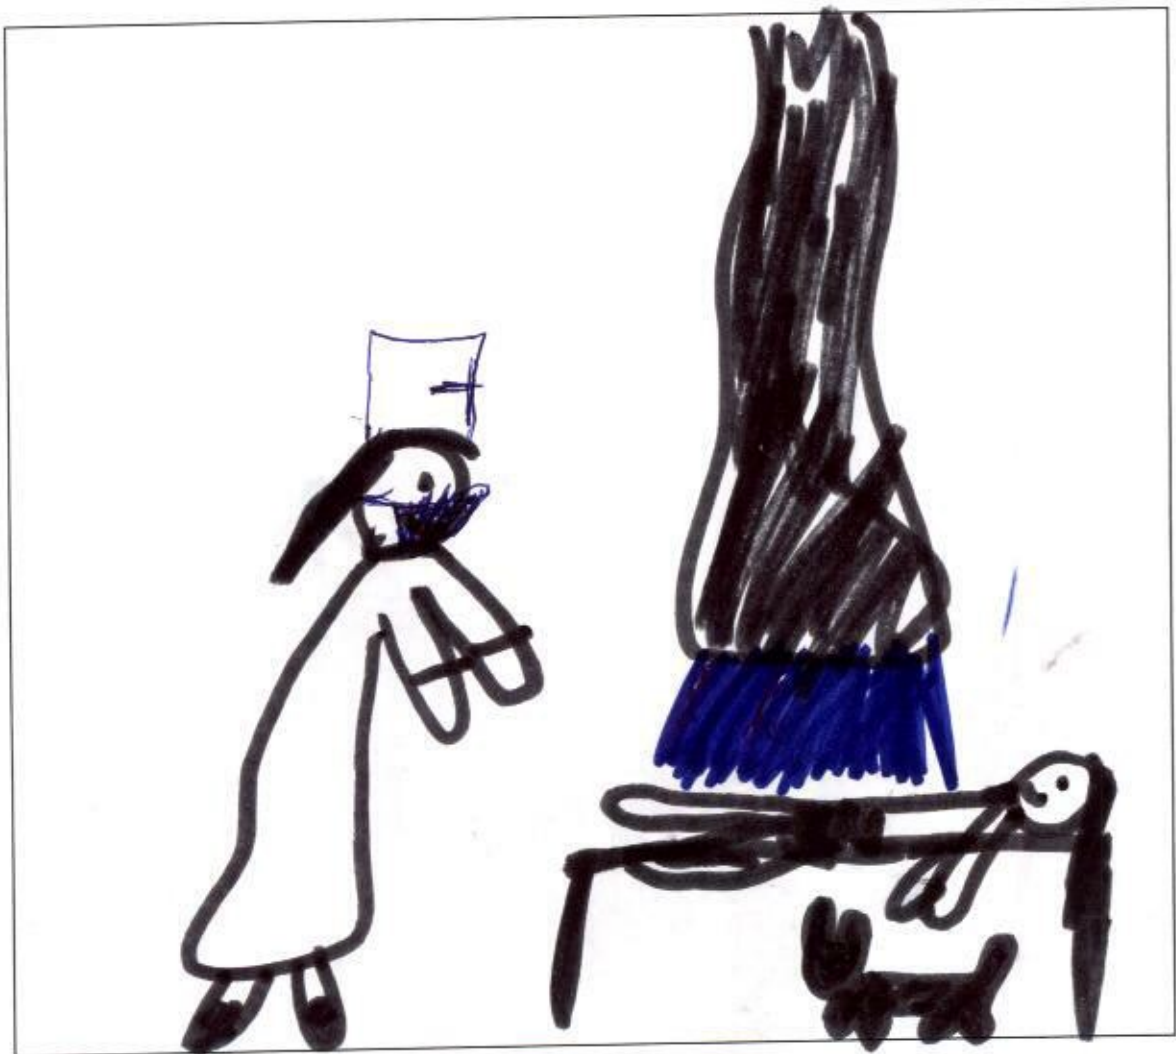

The cat came with them because their daughter saved it. The flowers were roses. They came and stopped at the front door and went inside. They went to the door and heard a voice. They turned around and saw a doctor. She said, "Who are you looking for?" "For our daughter" said the father, "who broke her leg." "Oh, she is in the bed room right there, or in the playroom, ^{right there} you can look ^{or there} there." They found her and gave her the flowers and went to the market, got the things and went home.

The girl was very sad and then the door opened and a doctor went inside and said "Why are you sad?" "Because I don't have my mum and dad." The doctor told her that ~~he~~ is going to help her and so ~~he~~ did.

she

she

He helped her to a room "It is where we make you better". So they went inside but she did not get better. And that is where the cat came inside and went to the girl and licked her because the cat was a magic cat. So it cured the girl and then the doctors called the parents. But they were in the market so they did not reach them.

The girl drove home on the ambulance and went through the window. ^{because she did not} And then the ^{have the} parents came and she had ^{all} the cat for herself ^{key} and they lived happily ever after. ^{the} **End.**
